

2020 In Reflection

Conserving and Protecting Canada's Water

CONSERVATION

- 6114 hours of assessment, planning and implementation of conservation programming to support the development of management plans for Canada's water.
- Rescued and repatriated 36,930 fish across Canada to protect threatened fish and bring awareness to the importance of native fish species.
- Continued to fight climate change and improve air and water quality by planting of over 3,750 trees.
- Repaired and connected over 7 kms of river and stream habitat. Protecting and enhancing native fish populations improving water quality while reducing the increasing impact of climate change.

EDUCATION

- Educated 8,000 people, improving knowledge and awareness regarding pollution, water quality and stream restoration.
- Since 1998, educated over 130,000 individuals through our Yellow Fish Road program, marking over 70,000 storm drains across Canada.
- Trained municipal, provincial and non-profit individuals in stream restoration.
- Over 20 individuals received electro-fishing training.

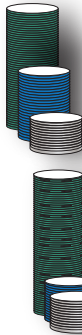

Canada's water needs YOU!

ADVOCACY

TUC aided in public education of critical issues through research and dissemination of information on 5 critical issues affecting water quality and flow and aquatic communities and their habitat in Canada. TUC also initiated talks with the government of Alberta towards increasing protections for sensitive habitat in light of losses of protective policy.

FINANCIAL STATEMENT

TUC greatly values the resources entrusted to us by our supporters, sponsors, partners and donors. We are committed to excellence in everything we do and strive to deliver value to the resource and our supporters, delivering \$4 of work on the ground for every \$1 donated.

REVENUE

Donations & grants 73%
Fundraising 16%
Other 21%

EXPENDITURE

Conservation 65%
Education 17%
Support Services 18%
